Electro- Encephalography (EEG)

Examination Information

Electro-Encephalography

Health Screening & Diagnostic Centre

1/F Main Block, St. Teresa's Hospital

Tel:(852) 2200 3155

Working Hours:

08:00-16:00 (Monday to Saturday)

Introduction

Electro-encephalography (EEG) is a test to record the activities of the nerve cells of the brain. The nerve cells are capable to emit electrical activity that can be picked up by the electrodes from the scalp and transformed into graphs for recording.

Purposes

EEG is a non-invasive and painless investigation. It is used as an aid of diagnosis for certain brain disease, e.g. epilepsy, encephalitis, brain tumors etc.

Procedure

- ※ We will gently apply some conductive peeling gel and attach EEG electrodes over your scalp.
- ※ All you have to do is stay relax, sit calmly on a chair and follow our instruction. The test will take about 60 minutes.

Preparation

1. Please book an appointment in advance and attend the booking on time.
2. Please bring I.D. Card / Passport or valid Hong Kong Travel Visa and referral letter with you on the day of examination.
3. Wash your hair the day before the test. No hair cream, gel or tonic should be applied.
4. Please bring a bottle of milk or pacifier for feeding the baby during the examination.

5. For children to have Sleep EEG, sleep is discouraged 4 hours prior to the test to facilitate a possible spontaneous sleep recording.

Care & Advice

1. For “Sleep EEG”, you can go home only after you are fully awake and accompanied by relatives.
2. Some sticky residue may leave in your hair which will come out with regular shampoo.
3. The result of the test will be delivered to your doctor-in-charge and will be explained to you.

If there is further concern about this procedure, please contact us or consult your doctor-in-charge.
